Coil protection grille for Roof Top ACTIVA 100/175

1.1 Assembly

- | | |
|---|---|
| 1. Outdoor coil of the unit | 5. Rubber stops, on both frames, top and bottom |
| 2. Protection grille (Models 100/125 x2, Models 150/175 x4) | A. Top frame side |
| 3. Assembly holes in the bottom frame | B. Bottom frame side |
| 4. Assembly holes in the top frame | |

1.2 General information

It consists of the grilles and the rubber stops necessary for installation.

1.3 Installation instructions

NOTE

See figure in section [Assembly](#), see on page 2.

1. Insert the rubber stops -5- in the assembly holes, both in the bottom -3- and top frame -4-, making sure they meet the mounting ends of the vertical rods of the grille.
2. Place the grille over the front of the outdoor coil of the unit.

ATTENTION

The assembly position must be correct, that is, the vertical rods on the front surface side of the coil and the horizontal ones of the outer side.

3. Place the ends of the longest vertical rods facing the top frame and fit them in the stops -5-.
4. Lastly, fit the ends of the shortest vertical rods in the stops -5- of the bottom frame.
